Section: **Heterocyclic Compounds (One Hetero Atom)**

The FeCl_3 -promoted synthesis of 2-azaspiro[4.6]undec-7-ene rings proceeds via ring expansion/cyclization/chlorination of *N*-tosyl-*N*-(3-arypropargyl)-tethered 6-methylbicyclo[4.1.0]heptan-2-ols. This azaspirocyclic ring skeleton can also be obtained in one ...
